

## Intent for Design and Technology

<b>The National Curriculum</b>	Our intent for D&T follows the purpose of study and the aims of the National Curriculum. At Hadleigh Infants and Nursery school we aim to inspire children to want to create and design with a purpose in mind. To do this, children must draw on other areas of the National Curriculum such as mathematics, science, computing and art.
<b>Barriers for our Children</b>	Many children at HINS lack confidence and resilience when expressing themselves creatively, children may lack a growth mindset approach. Children may also have limited exposure to Design and Technology in the wider world.
<b>Implementation</b>	Our children will have opportunities to be exposed to a range of different design and technology media influences. We will give our children the confidence to: <ul style="list-style-type: none"><li>- explore everyday products to find out how they work</li><li>- be able to select resources that meet the design brief and are fit for purpose</li><li>- make items that meet the design brief and develop their ideas to make their innovations.</li></ul> Through this learning process children will then be able to take risks, become more resourceful, innovative and be inventors of the future. Our children will have confidence to reflect, improve and evaluate their own work.
