2.

Welcome

Before letting your child explore the free, fun world of YouTube Kids, take a few minutes to decide on important parental safety controls.
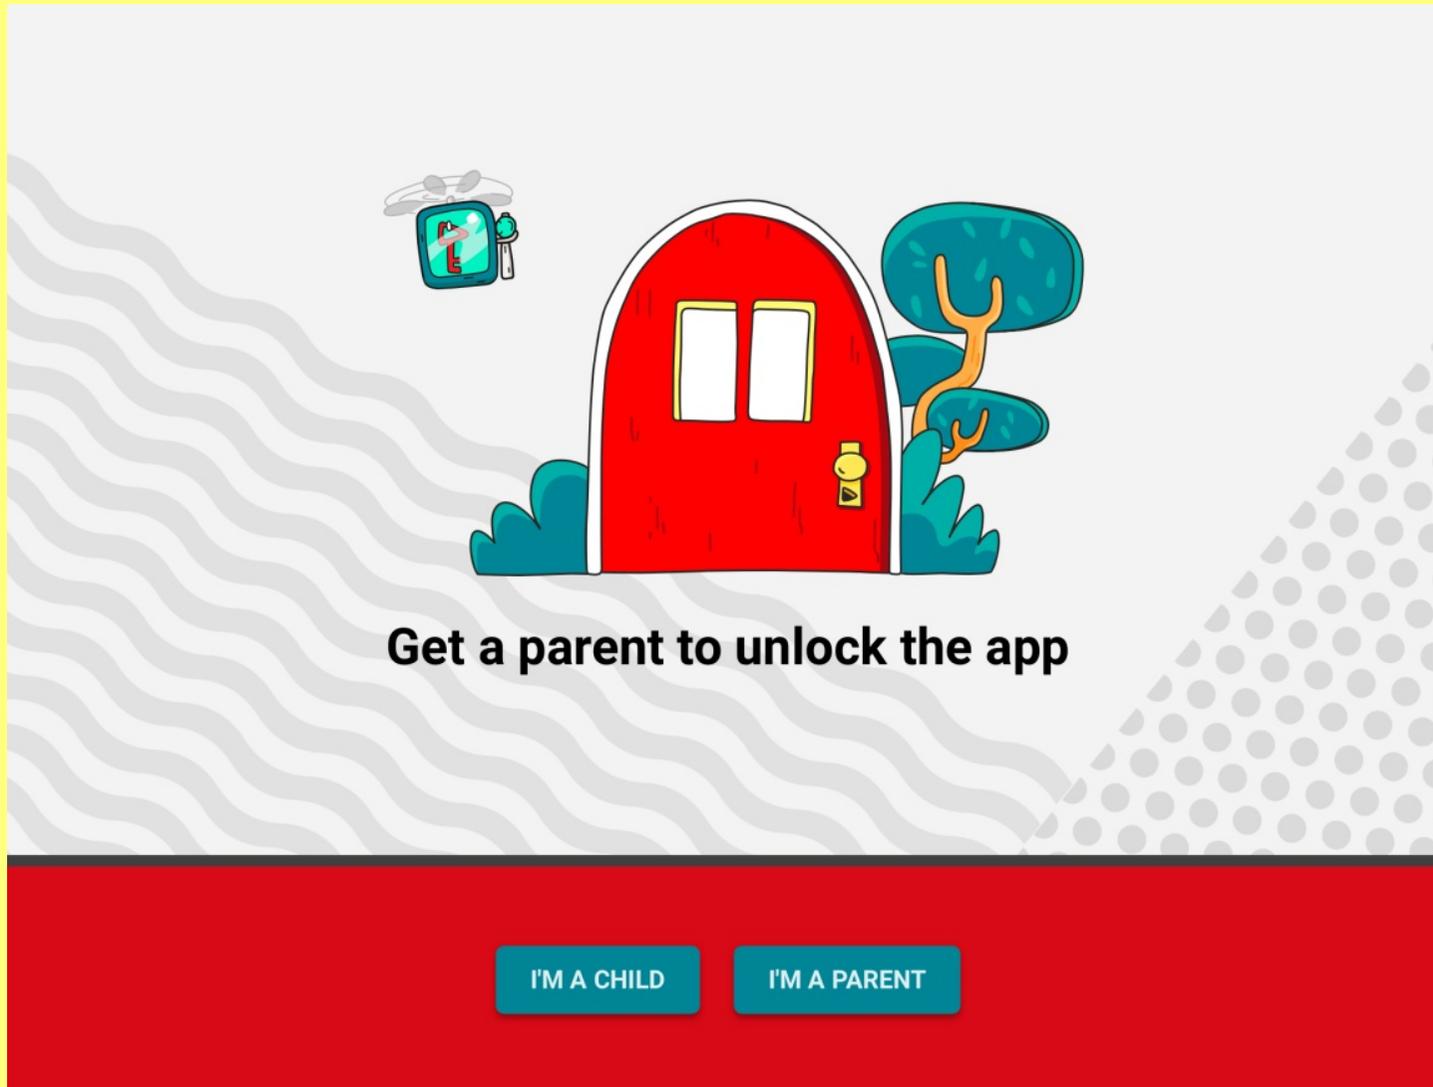

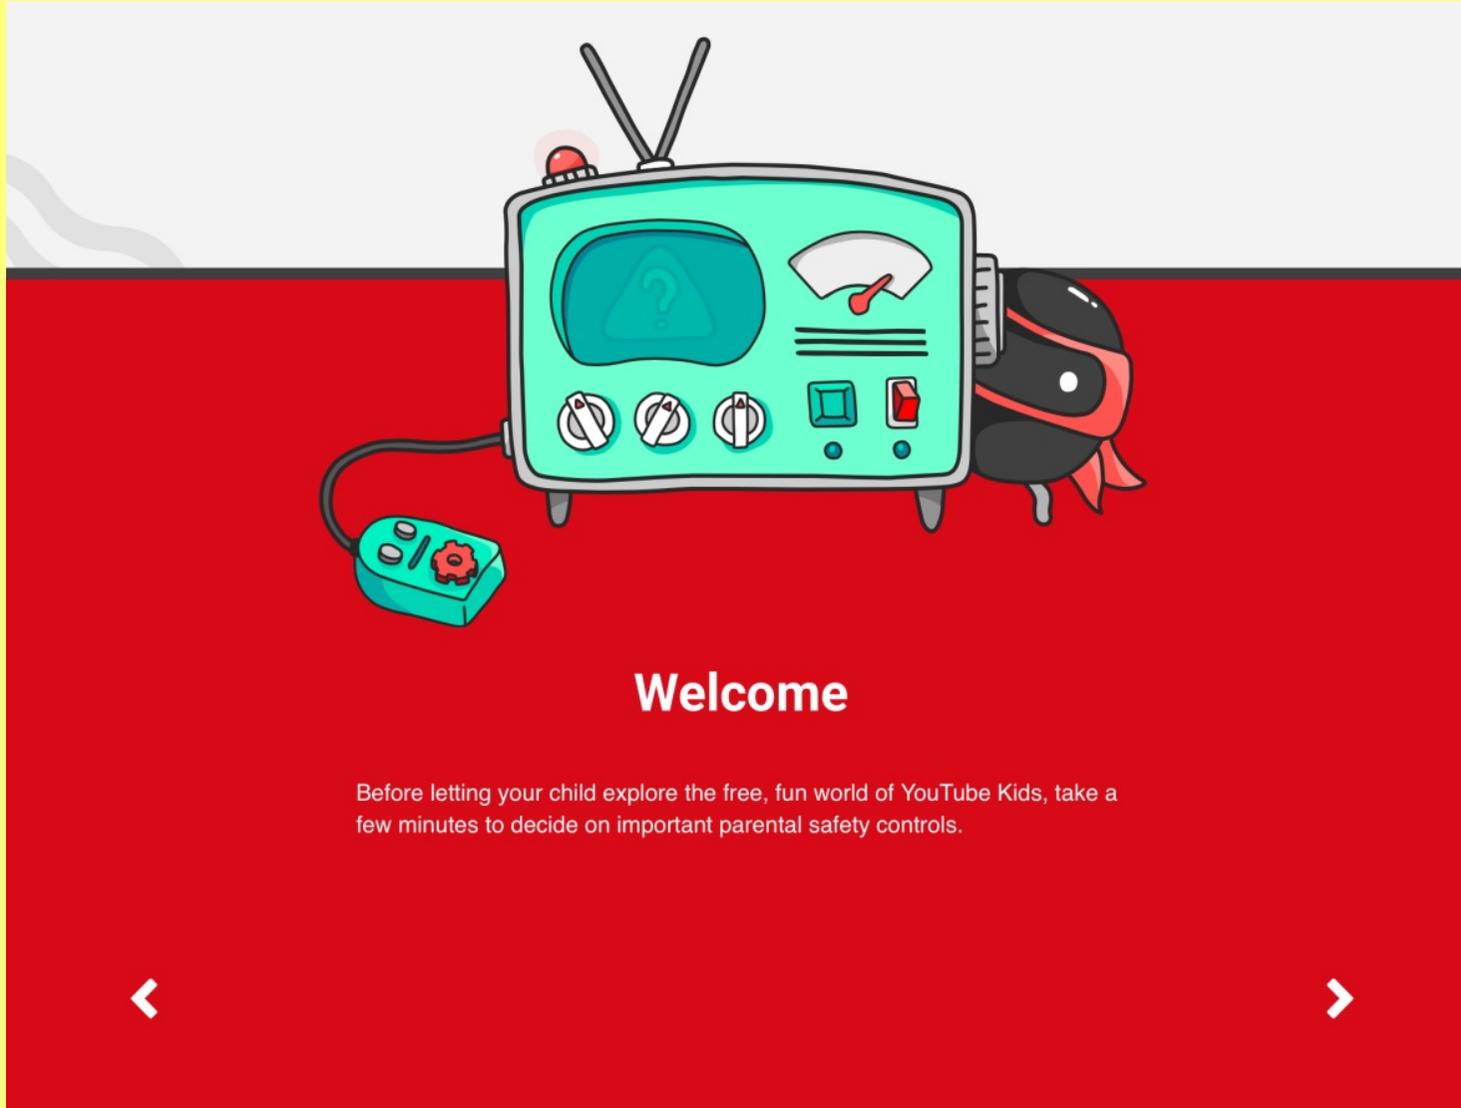

3.
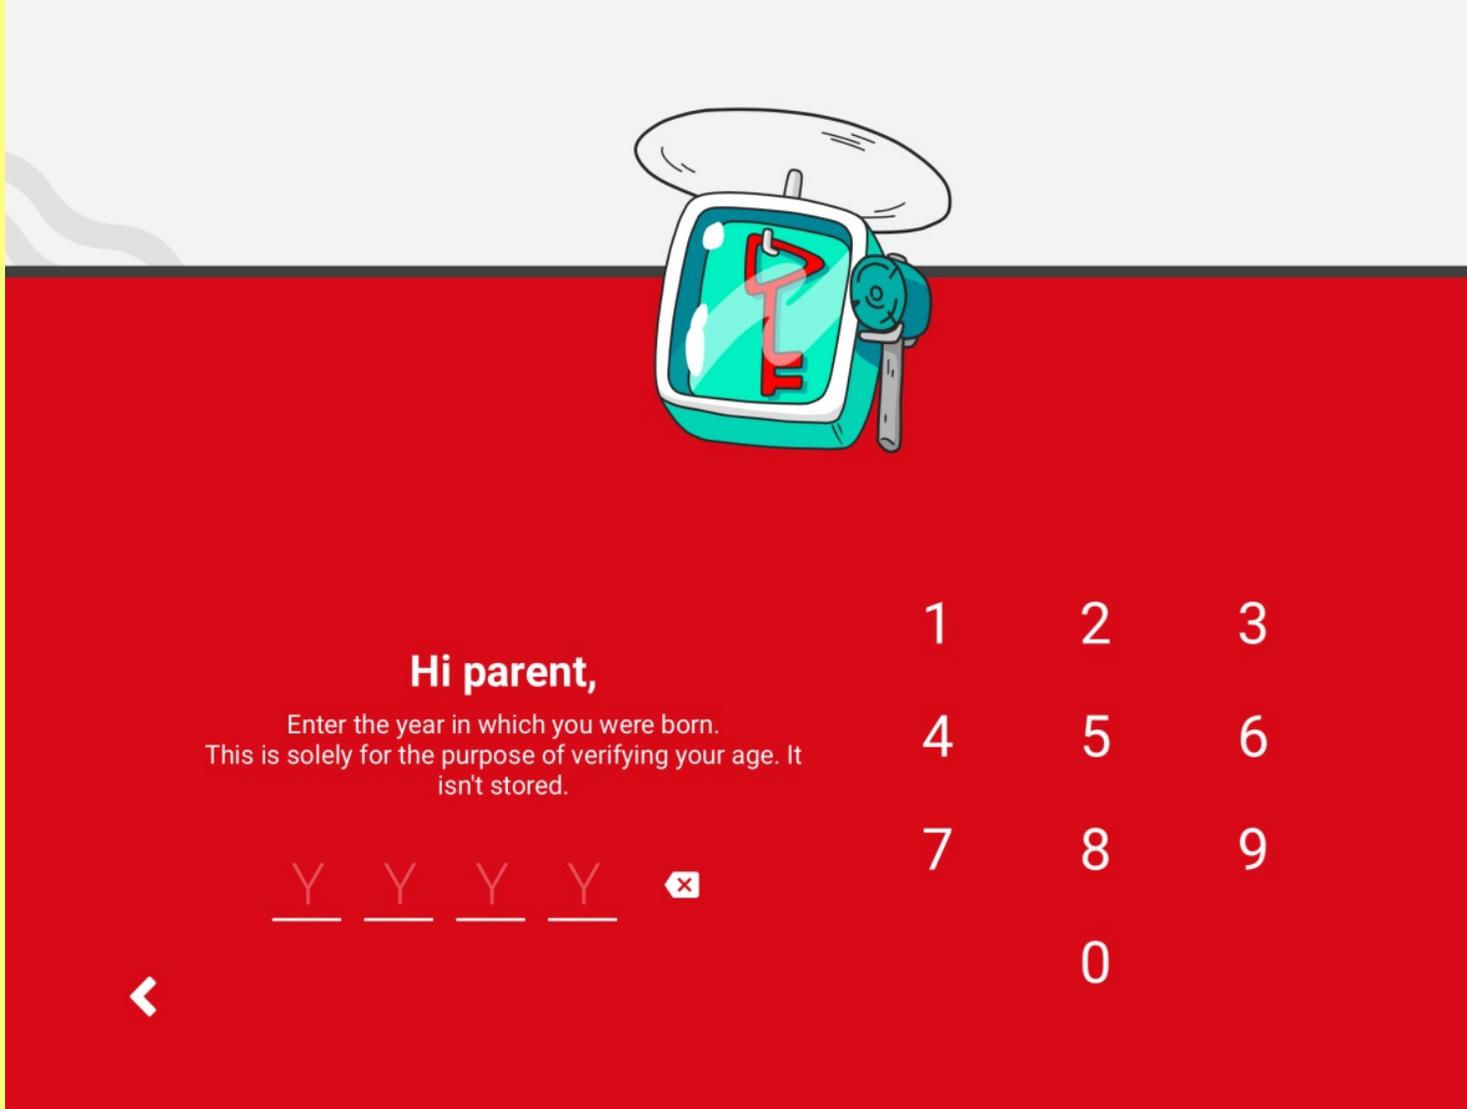

Hi parent,

Enter the year in which you were born.
This is solely for the purpose of verifying your age. It
isn't stored.

4.
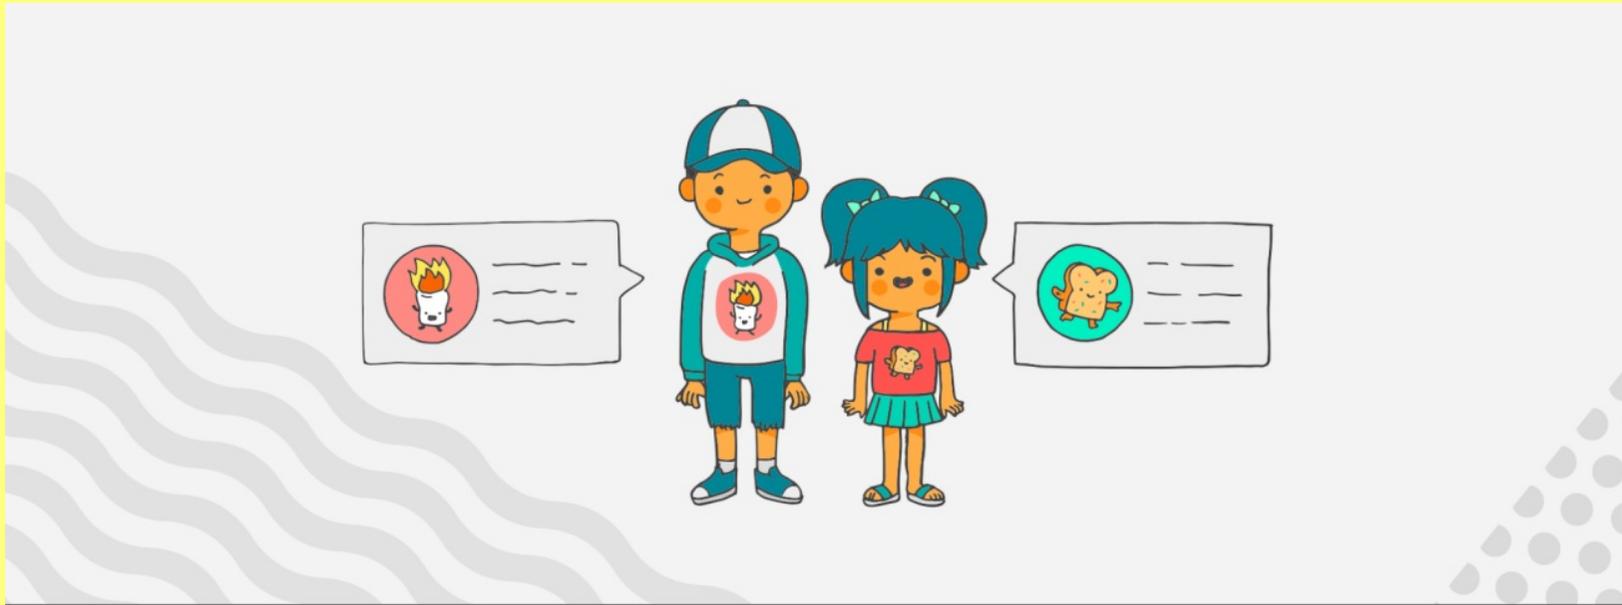

Sign in with a parent's account

Now you can sign in and create a profile for each child.
If you choose to sign in, you'll get more controls, whether you want
to allow lots of videos or hand pick your own. You can also block any
videos and channels that you don't like. The next time that you sign
in to a device, your children's profiles will be ready to go. Sign in with
a parent's account and we'll get started!

Younger

Content recommended for children aged 5–7.
Children can explore their interests and search for a wide variety of topics, including songs, cartoons, crafts and more. Our systems work hard to exclude content that is not suitable for young children, but not all videos have been manually reviewed. If you find something inappropriate that we've missed, you can flag it for fast review.

🔍 Search results are limited to content recommended for children who are 7 and under.

Notice to parents

Important privacy information about YouTube Kids

Before your child gets started, we want to make sure you understand how the app collects and uses personal information and the privacy controls available to you.

You are choosing to use YouTube Kids as a signed-out service. This means that you don't need to use your Google account for the app to work.

Information we collect

YouTube Kids collects information based on your child's use of the app, like when they watch a video.

Information about the device and app used to access the service. This information includes:

- device type and settings, such as hardware model and operating system version;
- log information, including details of how our service is used, device event information, and the device's Internet protocol (IP) address;
- unique application numbers, such as application version number; and
- unique identifiers, which are used to collect and store information about an app or device, such as preferred language, app activity and other settings.

App activity. This information includes the videos your child watches, their search terms, and other interactions with content and ads in the app. If a child uses audio features in the app such as voice search, the app briefly collects voice information. This information is processed to allow use of the audio feature and immediately deleted.

How we use the information we collect

We use the information we collect for internal operational purposes, such as spam and abuse prevention, enforcing our content licence restrictions, determining preferred language and providing and improving the service.
